

I am concerned to hear of the possibility of Low Power FM stations taking priority and thereby eliminating radio network's use of FM translators. One such network, K-LOVE, utilizes at least 2 translators within the Greater Phoenix, AZ area. K-LOVE provides a very useful service to the local community by providing a wholesome, honorable, character building alternative to some of the music that is currently on the airwaves. I have heard of many lives changed in positive ways by the music and information provided over K-LOVE radio stations/translators. For myself, a huge void would be created if K-LOVE radio went off the air, since it provides such encouraging and uplifting resources. I believe that my community is better served because of what K-LOVE has to offer, as it encourages listeners to live positive, honest lives, thereby cutting down on crime, etc. Please, I urge you to not allow the LPFM stations to undercut the positive influence positive radio networks such as K-LOVE have on our communities. Thanks for your time.
